Software Engineer

Completed an intensive 6 month Full-Stack Software Engineering program at UTSA. Collaborated on two team projects using Agile workflows – sprint planning in Trello, wireframing in Miro, and Git feature-branching with pull requests for peer review and QA. Built applications using a client-server architecture with clearly separated front-end and back-end layers across the PERN (PostgreSQL, Express.js, React, Node.js) and a solo MERN (MongoDB, Express.js, React, Node.js) stack project. Actively expanding into Java (Spring Boot) and MySQL via a TechNews application developed in IntelliJ IDE.
